Here are downloadable files for Patcon 2025 registration forms and entry forms. If you plan to enter one or more models in the contest, you need to complete one registration form listing all your entries, and one entry form for each entry. There are four entry forms on each sheet.

These are fill-in PDF files, so you may use your keyboard to enter the information and then print out the completed forms, or you may simply print out the forms and fill them in by hand. For the sake of legibility, we would prefer the former.

To complete the registration form, please provide all contact info in the top section, and list all your entries in the lines below. To fill in the category codes, please refer to the Patcon 2025 Category List, downloadable from the preceding web page. The model letter in each line, along with your contestant ID number, will be used to identify each of your entries. Your contestant number will be given to you at the show, so leave those spaces blank for now on your registration form and entry form(s).

To complete the entry form(s), please make sure for each entry that the information matches what's on the registration form including entry title, model letter and category ID.
